Education

Ewha Womans University Seoul, South Korea
B.S. in Artificial Intelligence 03/2023 - Present

Work Experience

Research Intern Seoul, South Korea
IRCV Lab @Hanyang University 01/2026 - Present
- Advisor: Prof. Soonmin Hwang
- Thesis: End-to-End autonomous driving, driving-scene 3D Gaussian Splatting, and multi-sensor dataset construction

Research Intern Pohang, South Korea
Computer Graphics Lab @POSTECH 06/2025 - 08/2025
- Advisor: Prof. Seungyong Lee
- Thesis: Geometry-Aware Regularization for Enhanced 3D Gaussian Splatting

Research Intern Seoul, South Korea
PAI Lab @Ewha Womans University 03/2024 - 01/2025
- Advisor: Prof. Junhyug Noh
- Thesis: Gait Re-Identification based on IMU data

Publications

1. Sumin Lee, Dohyun Lim, **Chehun Han**, *Soonmin Hwang, *“Chameleon Splatting: Temporal Appearance Modeling for Driving-Scene Gaussian Splatting”*, ECCV 2026 Submission. [Paper] [Code]

2. Dayeon Woo, Eunseo Seo, **Chehun Han**, Yeonkyung Lee, Changgyun Jin, *“Developing a Model for Improving 3D Gaussian Splatting Performance Based on DBSCAN”*, IEIE 2024. [Paper] [Code]

Research Experiences

End-to-End Autonomous Driving using Inter-Module Knowledge Distillation 01/2026 - Present
HYU IRCV Lab & RideFlux
- Investigating inter-module knowledge distillation to improve planning performance of end-to-end autonomous driving models under limited computational resources.
- Role: Teacher model selection, experiment design in collaboration with team members.

Data Machine Project 01/2026 - Present
HYU IRCV Lab
- Construction of a multi-modal autonomous driving dataset using LiDAR, radar, and cameras.
- Role: Responsible for radar-related tasks.

Novel View Pose Synthesis with Geometry-Aware Regularization for Enhanced 3DGS 06/2025 - 08/2025
POSTECH Computer Graphics Lab
- Improved the quality of 3D reconstruction using 3D Gaussian Splatting (3DGS) with Polycam by generating novel view camera poses and applying normal/depth consistency losses, resulting in more accurate geometry, enhanced multi-view consistency, and reduced artifacts.
- Role: Responsible for all stages of the project under the guidance of a senior researcher.
- [Project Page]

Implementation of Autonomous Driving Car 11/2024 - 02/2025
deepdaiv.
- Developed an end-to-end autonomous driving system that integrates object detection, lane recognition, and depth estimation to generate occupancy maps, plans paths using the A* algorithm, and executes control for full perception–planning–control automation.

- Role: Object detection, lane detection, system integration, seminar presentation
- [Project Page]

3DGS Memory Optimization 05/2024 - 08/2024

deepdaiv.

- A project focused on addressing the high memory usage problem of 3D Gaussian Splatting by developing a new model.
- Role: Optimization architecture design

Awards and Honors

Excellence Award (2nd Prize), AI Idea Competition 12/2023

Ewha Womans University, Department of AI

- Proposed a multimodal program for diagnosing depression using facial and voice data, smartphone sensors, and usage logs.

Skills

- Programming: Python, C++, C, Bash
- Machine Learning / Vision: PyTorch, NumPy, Pandas, OpenCV, Open3D
- Robotics / Systems: ROS2, Jetson Linux, Ubuntu
- Tools: Git, Docker, Conda, LaTeX
