EDUCATION

Ewha Womans University

B.S. in Artificial Intelligence

Seoul, South Korea

03/2023 - Present

WORK EXPERIENCE

Research Intern

[Computer Graphics Lab @POSTECH](#)

Pohang, South Korea

06/2025 - 08/2025

- Advisor: **Prof. Seungyong Lee**
- Thesis: Improving the quality of indoor 3D Reconstruction based on 3DGS

Research Intern

[PAI Lab @EWHA](#)

Seoul, South Korea

03/2024 - 01/2025

- Advisor: **Prof. Junhyug Noh**
- Thesis: Gait Re-Identification based on IMU data

PUBLICATIONS

1. Dayeon Woo^{†1}, Eunseo Seo^{†2}, **Chehun Han**^{†3}, Yeonkyung Lee^{†4}, *Changgyun Jin⁵, "Developing a Model for Improving 3D Gaussian Splatting Performance Based on DBSCAN", IEIE 2024, Nov. 2024. [\[Paper\]](#) [\[Code\]](#)

RESEARCH EXPERIENCES

3DGS Quality Enhancement

11/2024 - 02/2025

[POSTECH Computer Graphics Lab](#)

- Improved indoor 3D reconstruction using 3D Gaussian Splatting (3DGS) with Polycam by generating novel view camera poses and applying normal/depth consistency losses, resulting in more accurate geometry, enhanced multi-view consistency, and reduced artifacts.
- Role: Responsible for all stages of the project under the guidance of a senior researcher.

Implementation of Autonomous Driving Car

11/2024 - 02/2025

[deepdaiv](#).

- Developed an end-to-end autonomous driving system that integrates object detection, lane recognition, and depth estimation to generate occupancy maps, plans paths using the A* algorithm, and executes control for full perception-planning-control automation.
- Role: Object detection, lane detection, system integration, seminar presentation

3DGS Memory Optimization

05/2024 - 08/2024

[deepdaiv](#).

- A project focused on addressing the high memory usage problem of 3D Gaussian Splatting by developing a new model.
- Role: Optimization architecture design

AWARDS AND HONORS

Excellence Award (2nd Prize), AI Idea Competition

12/2023

Ewha Womans University, Department of AI

- Proposed a multimodal program for diagnosing depression using facial and voice data, smartphone sensors, and usage logs.

SKILLS AND TECHNIQUE

- Languages: Python, C, JavaScript, HTML/CSS, SQL, Bash
- Technologies: PyTorch, NumPy, Pandas, OpenCV, Open3D, Matplotlib, Flask
- Tools: Git, GitHub, Conda, Docker, LaTeX, Figma
- OS: Ubuntu, Jetson Linux, macOS, Windows
